They want to be seen, felt and used: the elegantly formed bathtubs from burgbad, which, with the sensual materiality of moulded mineral, are a true experience. You decide at which spot in the bathroom the tub best exerts its effect in order to be an oasis of tranquillity for you.

Mineral cast bathtubs from burgbad are far too beautiful to be placed up against a wall. Choose your object of desire from a range of different shapes. To match: striking yet understated shower trays.

burgbad WCs and bidets allow for various possible designs: their design picks up on that of burgbad furniture to create an overall harmonious look. WCs and bidets, whose geometry contrasts with that of the bathroom furniture, set interesting new trends.
